6.0m		R667.10	R874.50	R1,170.20	R1,456.10		

CUSTOMERS PLEASE NOTE

SABS 457 specification states that tapered poles are classed (measured) on the THIN end of the pole only.

A 80-99mm pole will measure between 80mm and 99mm on the THIN end.

The thick end is not measured and may vary due to the natural taper of timber poles.

CORRECT METHOD OF PLANTING POLES

- If a treated pole or post is planted in the ground it is essential that you allow for drainage of rainwater.
- Do not enclose the planted end of the post in the concrete.
- If you need to use concrete then let the concrete form a collar around the post with the end protruding through the concrete.
- If you plant the post on concrete at the bottom of the hole, let the concrete set before planting the post

CUSTOMERS PLEASE NOTE

When sinking an upright post or pole for your fencing you should allow for 600mm to be concreted in the ground.

Recommended maximum panel widths:
 up to 2.1m High = Max 2.1m Wide
 2.4m High = Max 1.8m Wide
 Above 2.4m High = Max 1.5m Wide

TIMBER FENCING - CUSTOM PANELS

All of our fencing panels are manufactured to your specifications. Please use the provided tables as a guideline. Our panels are CCA pressure treated for resistance to borer, rot and fungal infections. We do advise you to coat your fencing with a suitable wood-seal or wood-coat once installation is complete. We also stock a range of hardware required for the installation of our products.
